Artist statement

Beyond technical considerations, I have to be affected, moved by something about human; I can't work on roses or on fractals... Cesare Pavese, Unica Zürn, Diane Arbus, Emma are part of my family... the technique is secondary.

Short bio

I live and work in Belgium (Europe) as an art historian.

I'm the son of the poet Alain Clery. I always saw art works at my home. I started working with traditional tools (oil, acrylic); Very soon I was interested in indirect techniques such as printmaking and photography: you have to wait for a surprising result, coming from the printing process or from the "revelator" liquid; it's a kind of suspense...
